

First to Become CALGreen Compliant

California Faucets' affordable thermostatic shower system adds water savings to its repertoire of impressive features

(Huntington Beach, CA, January 12, 2012) California Faucets' new version of *StyleTherm*® has set the standard for thermostatic valve technology as the first system on the market that is entirely California Green Building Standards Code (CALGreen) compliant. Consumers stand to benefit from the breakthrough on several fronts. The innovation that led the company to the development of the first CALGreen-compliant thermostatic valve fulfills California's stringent new water conservation requirements, while providing users spa-like shower enjoyment at an affordable price point.

To meet the standards set forth by the nation's first statewide green building code, *StyleTherm* employs a unique two-outlet diverter valve with volume control features. The diverter allows users to toggle between single shower applications, thus meeting CALGreen code requirements, while still offering all the superior features and benefits of a thermostatic shower system, including volume control, anti-scald safety protection, and exact water temperature setting.

The CALGreen version of *StyleTherm* has a volume control dial that engages up to two shower applications individually. By turning the dial clockwise, the user engages a single application, such as a showerhead, for example. Turned counterclockwise, the previous application discontinues and a new application, such as body sprays or a handheld shower engages. Unlike pressure balance systems, the CALGreen version *StyleTherm* has full volume control, allowing precise, independent on/off and flow rate control of each application. Each individual application can flow at a rate of up to two gallons per minute (GPM).

CALGreen-compliant *StyleTherm* is available in three trim options—Round Traditional, Round Contemporary, and Rectangular Transitional—that complement California Faucets' 25-plus handle styles and more than 34 decorative finishes. List price for CALGreen-compliant *StyleTherm* is \$429. Trim is sold separately and is priced according to style and finish.

CALGreen-compliant *StyleTherm* meets California's stringent new conservation requirements

About California Faucets

Founded in 1988, *California Faucets* has established itself as an industry leader through its elegant, superior quality decorative fittings. The company has since grown a reputation for innovation. Within the shower system category, its groundbreaking *StyleTherm*® thermostatic shower has brought affordable thermostatic technology to the mainstream consumer. *StyleDrain*®, the industry's first decorative shower drain, and the international award winning *CeraLine*™ linear shower drain have revolutionized the shower drain category. Offering the ultimate in flexibility, *Custom Faucetry*®, continues to grow with dozens of designs and decorative finishes that mix and match. Millions of custom designs are made possible through the company's user-friendly online tool, the *Virtual Faucet Creator*®.
